## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant implies in its argument that examiner did not fully consider the reply filed on November 17, 2003. This is not persuasive since the examiner replied in a six page advisory action after fully consider applicant's after final filing of November 17, 2003.
2. Applicant's representative had verbally clarified to the examiner what the adjustment unit is meant to do in claim 1. Here is the examiner's understanding of the adjustment unit based on this clarification: The adjustment unit receives a mode signal. This mode signal tells the adjustment unit whether data input is from an asynchronous system or a synchronous system. If the mode signal indicates that the data is input from a synchronous system, then the adjustment unit will send a signal to the transfer control circuit. This signal to the transfer control circuit will be clocked based on a clock from an external source. This clock from the external source is different from the clock synchronous clock. If the mode signal indicates that the input is from an asynchronous signal, then the adjustment unit will not send a signal to the transfer control circuit.

### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance:
4. The art of record does not suggest the respective claim combinations together and nor would the respective claim combinations be obvious with:
5. As per claims 1-9: understanding of the adjustment unit of claim 1 described in this action.
6. As per claims 10-13: adjustment unit and mode signal limitations

Art Unit: 2631

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
